ClickShare

Bring people, content and ideas together

No cables

With the universal ClickShare USB button and click Share app for iOS and Android can be the unsightly cable clutter that often are in meeting rooms , avoid . There is no special adapter or connection required so you have no additional cables to himself or to rummage under the table . And without cables you need less time configuring and more time for productive work.

No software

If you connect a ClickShare button , you need to download any software and install . You just accept an executable file and can get started . When you are finished, click Share leaves no software on your PC or Mac .

Complexity

ClickShare could not be easier . Everything works with the click of a button and no more. By connecting ClickShare their screen size or resolution is not changed . That is what you see on your laptop screen is accurately reproduced on the big screen in the conference room .

Strain

With ClickShare the technology is on your side , because the intelligence is working for you . If ClickShare is used in a meeting room , you can rest assured that your important presentation is transmitted with one touch of the button on the big screen .
